Eastern Time, USA

Software Engineer w/ 13+ years experience
React, TypeScript, Next.js, Node.js, Postgres, GraphQL, Tailwind
Github Copilot, Cursor, Claude Sonnet 4.6, Claude Opus 4.7, GPT-5.5

Side-project details at willmruzek.com/projects

SUMMARY

I'm Will Mruzek, a software consultant and engineer with 13+ years of experience. I've worked with startups and established companies like Syncari, Reforge, and Intuit Credit Karma. Previously, I've held full-time engineering roles at Humble Bundle, CloudPassage, Spredfast, and Duo Security (Cisco).

I frequently work in React, TypeScript, Next.js, Node.js, Postgres, GraphQL, and Tailwind. I'm passionate about developer tooling, developer and user experience, type-safety, and functional programming. I aim to craft code that's principled, predictable, and adaptable to change, while avoiding unnecessary complexity.

Outside of work, I sing, compose music, act, and write.

EXPERIENCE

Senior Software Engineer (Consultant) · Luma

Jun 2026 – Aug 2026 · 3 mos

Consulting · Remote

React | TypeScript | Python | Postgres | TanStack Query | tldraw SDK | Next.js | Vercel | Sanity | Claude Code

Senior Software Engineer (Consultant) · CreditKarma

Nov 2024 – May 2026 · 1 yr 7 mos

Consulting · Remote

React | TypeScript | Node.js | GraphQL | Microservices (Thrift) | Next.js | Design system UI component library | React Server Components | XState | Panda CSS | Cursor

- Helped launch Intuit Credit Karma's first zero-to-one subscription product across desktop, mobile web, and in-app web experiences
- Built multistep, stateful flows with XState, including an identity theft assessment and cancel subscription flow
- Led the migration of the main user profile app from React Router to Next.js and integrated it with Credit Karma's bespoke deployment infrastructure

Senior Software Engineer · Reforge

Apr 2023 – Oct 2024 · 1 yr 7 mos

Consulting and Full-time · Remote

React | TypeScript | Next.js | GraphQL | Ruby on Rails | Tailwind | Sanity CMS | Vercel

- Revamped the Artifacts home feed by combining Sanity CMS content with GraphQL queries to produce a sorted, filterable list of expert work examples
- Consolidated a standalone Next.js app (Artifacts) into the main React + Ruby on Rails app, homogenizing the tech stack for all app features

Senior Software Engineer (Consultant) · CreditKarma

Mar 2021 – Mar 2023 · 2 yrs 1 mo

Consulting · Remote

React | TypeScript | Node.js | GraphQL | Microservices (Thrift) | Design system UI component library

- Implemented green-field web and mobile experience to help millions track their income and better understand their taxes
- Extended multiple frontend React apps and TS/JS libraries, supporting both infrastructure and product changes
- Improved accessibility in site navigation, including keyboard navigation support
- Evaluated Apollo vs. URQL; URQL was adopted as the default GraphQL client across the org for its smaller API and bundle size

Senior Software Engineer (Consultant) · Syncari

Jan 2021 – Mar 2021 · 3 mos

Consulting · Remote

React | TypeScript | Java | Spring Boot

Senior Software Engineer (Consultant) · Zathom

Jun 2019 – Nov 2020 · 1 yr 6 mos

Pre-seed · Consulting · Remote

React | GraphQL/Apollo | XState | TS | Styled-Components | AWS Amplify | AWS AppSync | AWS Cognito | AWS DynamoDB | AWS Lambda

- Rapidly iterated on product concepts for a creator social network targeting writers, supporting a fast-moving founder in PMF exploration
- Built out writing tools and game-like experiences that encouraged good storytelling and cross-user engagement
- Mentored junior engineer in React, GraphQL, and AWS infrastructure

Senior Software Engineer · Duo Security

Nov 2018 – Jun 2019 · 8 mos

Full-time · Austin, Texas

React | jQuery | Python

- Led the migration of shared table and filter UI across the admin interface from a jQuery-based implementation to React
- Built a testing framework for validating the new table infrastructure, accelerating UI development
- Modified internal and customer-facing backend APIs in Python

Senior Software Engineer · Spredfast™

Jun 2017 – Nov 2018 · 1 yr 6 mos

Full-time · Austin, Texas

Javascript | Flow | React | Redux | ImmutableJS | SASS | Webpack | SocketIO | Jasmine

- Maintained and extended a support-over-social-media application, integrating React and social streams into the UI
- Improved code quality and developer tooling while sustaining 95% test coverage and strong static typing with Flow
- Maintained the shared UI component library used across multiple products, ensuring consistency and reusability across the organization
- Mentored engineers on architecture, feature development, and typed JavaScript best practices

Software Engineer · Skybound Digital

Dec 2015 – Jun 2017 · 1 yr 7 mos

Consulting · Remote

Laravel | PHP | React | Redux | JS | SASS | MySQL

- Built and maintained a customer- and bizops-facing portal to facilitate the selection of keywords for SEO campaigns
- Integrated third-party APIs like Stripe for payments and bank transfers

Front End Software Engineer · CloudPassage

Sep 2014 – Jul 2015 · 11 mos

Full-time · San Francisco, California

AngularJS | SASS | Gulp | Babel | ES6 | Webpack | Ruby on Rails

- Architected and built zero-to-one a single-page application for the second generation of the company's main product
- Built and extended custom AngularJS directives to support exhaustive reporting of cloud server instances
- Partnered with UX and DevOps to launch the product across multiple environments
- Maintained legacy Ruby on Rails application during the migration to the new frontend

Software Engineer · Humble Bundle

Dec 2013 – Sep 2014 · 10 mos

Full-time · San Francisco, California

AngularJS | Backbone.js | Python | Jinja | Javascript | jQuery | SASS | Grunt | RequireJS / r.js

- Built and unit tested a partner-facing AngularJS dashboard for managing store and widget products
- Architected an internal JSON-to-HTML system that enabled product ops to draft and publish bundle promotion pages without recurring engineering support
- Modernized the front-end workflow with SASS, Grunt, RequireJS / r.js, and component-based architecture

Software Engineer · Glerb

May 2013 – Dec 2013 · 8 mos

Full-time · Bloomington, Indiana

Javascript | BackboneJS | MarionetteJS | jQuery | PHP | CakePHP | MySQL | HTML | CSS

- Built a spaced-repetition application for helping users memorize information efficiently
- Migrated front-end Javascript to a modular architecture with MarionetteJS maintaining current functionality
- Implemented deploy pipeline to AppFog PaaS, streamlining and easing the release process

EDUCATION

Indiana University - Bloomington

Bachelor of Arts, Communication and Culture

High Distinction (3.81 GPA)
